NICE guideline on pelvic floor dysfunction: prevention and non-surgical management

Now available on the UKCS Website at: www.ukcs.uk.net/home

This guideline covers the prevention, assessment and non-surgical management of pelvic floor dysfunction in women aged 12 and over. It aims to raise awareness and help women to reduce their risk of pelvic floor dysfunction. For women who have pelvic floor dysfunction, the guideline recommends interventions based on their specific symptoms.

UKCS 2021 Online Annual Scientific Meeting

It was not the same but our virtual Annual Scientific Meeting had all the hallmarks of the educational values and friendship of UKCS.

Registered delegates can re-visit the conference free of charge and those who missed it can enjoy the whole event and get CPD points as a new Registrant.

2022

Female Stress Urinary Incontinence: Urethral Bulking Agents

17.00 - 18.30: Thursday 13th January 2022

*Moderator: Karen Guerrero, Consultant Urogynaecologist
NHS Greater Glasgow & Clyde.*

Chair, UK Continence Society

Introduction

The NICE Guideline 2019 says that bulking agents should be used only if alternative surgical procedures are either unsuitable or not acceptable to the woman. The Cumberlege Report published the following year states that bulking agents should be considered before surgical procedures. Which is it?

Since the publication of the NICE Guideline, RCT data comparing bulking agents and tapes, seven year data on bulking agents, and a UK based study around patient choice, have all been published. Furthermore, there has been a move across the UK towards bulking agents. This partly due to the suspension of mesh tapes, but also driven by reduced access to theatre space during the pandemic, and thus the move to offer bulking procedures in the ambulatory setting.

So what is the latest thinking on the optimum approach to treating women with SUI if conservative approaches have failed to provide an adequate improvement?

Bulking agents: do recent publications support its use as a primary procedure for SUI.

Speaker: Ash Monga, Consultant Gynaecologist and Sub-specialist Urogynaecologist in the University Hospital Southampton Trust

NICE Guidelines vs the Cumberlege Report, 2020. Do recommendations conflict in the management of SUI and the role of BNI.

Speaker: Tamsin Greenwell, Consultant Urologist and Honorary associate Professor, University College London

What do women choose as surgical treatment for SUI, and is there a difference between secondary and tertiary centres in the procedure that women choose (Latitude study).

Speaker: Fiona Reid, Consultant Gynaecologist and Sub-specialist in Uro-gynaecology, Manchester University NHS Trust

Bulking in the ambulatory setting – does this make sense for the patient, the hospital, the finance director?

Speaker: Jeremy Weetch Consultant in Wirral Women and Children's Hospital.

an Axonics sponsored Education Event

Neuromodulation: advances in technology and clinical practice in a post Covid world.

18.30 to 20.00 Thursday 20th January 2022

*Moderator: Tamsin Greenwell,
UKCS Vice Chairperson*

Session 1: The Importance of the Continence MDT in an SNM Service.

Speakers: Miss Suzy Elneil, Consultant Urogynaecologist and Uro-neurologist at UCLH and the National Hospital for Neurology and Neurosurgery and

Miss Mahreen Pakzad, Consultant Urological Surgeon, University College London Hospitals.

Current Guidelines and Clinical Pathway: pelvic floor dysfunction - EAU vs NICE.

UCLH Patient Management: the role of the Continence MDT.

Predominance of Urology in the management of tertiary PFD across the UK.

Decision Making and Expanding Indications.

Session 2: Tips From Practice Outside the UK.

Speaker: Kevin Benson, Obstetrician/Gynecologist in Sioux Falls, South Dakota, USA

Update on AUA Guidelines.

Similarities and Differences Between UK and US Practice.

Session 3: Aligning SNM with the Pelvic Floor Society Report.

Speaker: Miss Kim Corissen, Consultant in Emergency & Colorectal Surgery at the Oxford University Hospitals NHS Foundation Trust.

The Pelvic Floor Society Post COVID Report: key learnings.

Application of Technology to Support Service Optimization.

Panel Discussion led by Tamsin Greenwell

a Medtronic Sponsored Education Event
